

Product / Design

Matt Szaszko

Profile

After a sabbatical I’m continuing my career at the verge of Product and Design. My experience spans 3 continents and as a former founder I’m driven by a passion for solving problems with technology while delivering value to the customer and the business. Combining my background in psychology with my experience managing complex technical products, supercharged with the thoughtful application of AI I excel in highly collaborative environments. Talking to customers on a Monday, collaborative design sessions on a Tuesday, board meeting on Wednesday, development deep dive with the team on Thursday, launch party on Friday, pushing to Prod on Saturday.

Experience

Product Owner IAM | TOPdesk

June 2024 – June 2025 | Delft, NL

- Uncovered €1M+ in customer licensing opportunities across enterprise accounts by analyzing system architectures and account usage data.
- Led a major IAM system rewrite to deprecate legacy architecture, engineering a modern microservices backend to support enterprise client SSO and security requirements.
- Aligned commercial strategies with engineering delivery, reducing deployment friction for enterprise SaaS clients.

Technical Co-founder | Inframent

September 2022 – November 2023 | Noordwijk, NL

- Designed and developed ConTech mobile app for underground infrastructure construction compliance reporting. Raised 100k from PLNT Leiden and ESA Incubator.
- Led end-to-end technical discovery with B2B infrastructure executives to translate manual underground cable reporting workflows into high-margin software solutions.
- Managed direct technical stakeholder alignment with European Space Agency (ESA) engineers to validate GNSS positioning accuracy in complex urban environments.

Senior Product Manager - Consumer Experience | Zivver

May 2021 – April 2022 | Amsterdam, NL

- Complete redesign of the patient authentication and inbox flow while delivering on the brand redesign under tight deadlines. This flow has 1M+ MAUs.
- Led critical frontend upgrades while maintaining legacy browser compatibility for enterprise compliance, maintaining 100% platform availability.
- Conducted technical discovery and accessibility workshops with external partners (Koninklijke Visio) to overhaul core mobile and web platform accessibility.

Product & Design Person | WeTravel

September 2019 – September 2020 | Amsterdam, NL

- As first Product hire, I designed and shipped solutions for US tax reporting compliance connecting TurboTax and building self-serve workflows using Zapier.
- Implemented automated risk safeguards that mitigated \$5.7M in chargeback exposure and reduced operational overhead by \$1.5M during major market disruption (COVID).

Product & Design Person | Ex Machina

2018 – 2019 | Amsterdam, NL

- Platform management and implementation for ultra-low latency ultra high scale interactive video platform for top tier media clients globally (mainly US, some EU and Asia)
- Got platform to 100% uptime and scaling (1m+ concurrent users) via stress tests and carried out pen testing (managed vendor selection and end-to-end process)

AI Product Designer | Bicycle AI (Y Combinator W17)

2017 – 2018 | San Francisco, CA / Bangalore, IN

- Designed and implemented human in the loop self learning conversational AI solutions for chat based customer service. Operationalized internal ML training workflows.
- Post pivot designed live interactive video based quiz game mobile app for the Indian market. Scaled to 500k+ downloads and 60k+ concurrent players. 4.6 Play Store rating.

Early career

2013 – 2017 | Budapest, HU / Warwick, UK / Bangalore, IN

- Interned at pharmaceutical market research and market access companies in Hungary, UK and India
- Member of Nestlé’s leadership development program for ~3 years in Hungary, worked in the Budapest office and did Field Sales, Controlling and Trade Marketing
