

Sales Engineer / Solutions Engineer

Matt Szaszko

Profile

I’m pivoting to Sales Engineering after a successful career in Product Management spanning 3 continents and as a former founder, driven by a passion for direct, client-facing challenges. Proven track record of bridging commercial and engineering teams, conducting multi-threaded enterprise discovery, and contributing to pre-sales efforts for \$1M+ ARR deals. Highly adept at using modern Generative AI tools to accelerate technical discovery, PoC development, and API integration workflows.

Experience

Technical Product Owner & Solutions Specialist | TOPdesk

June 2024 – June 2025 | Delft, NL

- Uncovered €1M+ in customer licensing opportunities across enterprise accounts by analyzing system architectures and account usage data.
- Led a major IAM system rewrite to deprecate legacy architecture, engineering a modern microservices backend to support enterprise client SSO and security requirements.
- Aligned commercial strategies with engineering delivery, reducing deployment friction for enterprise SaaS clients.

Technical Co-founder | Inframent

September 2022 – November 2023 | Noordwijk, NL

- Worked hands-on with early-adopter enterprise clients to integrate SaaS mapping solutions directly into their existing GIS workflows, building custom API connectors
- Led end-to-end technical discovery with B2B infrastructure executives to translate manual underground cable reporting workflows into high-margin software solutions.
- Managed direct technical stakeholder alignment with European Space Agency (ESA) engineers to validate GNSS positioning accuracy in complex urban environments.

Senior Technical Product Manager | Zivver

May 2021 – April 2022 | Amsterdam, NL

- Partnered directly with Sales and Legal teams on technical pre-sales, security reviews, and architecture validation for major enterprise accounts, securing \$1M+ ARR deals.
- Led critical frontend upgrades while maintaining legacy browser compatibility for enterprise compliance, maintaining 100% platform availability across 1M+ active users.
- Conducted technical discovery and accessibility workshops with external partners (Koninklijke Visio) to overhaul core mobile and web platform accessibility.

Product Manager & Solutions Lead | WeTravel

September 2019 – September 2020 | Amsterdam, NL

- Partnered with top enterprise accounts to architect solutions for US tax reporting compliance connecting TurboTax and building self-serve workflows using Zapier.
- Designed automated risk safeguards that mitigated \$5.7M in chargeback exposure and reduced operational overhead by \$1.5M during major market disruption (COVID).

Solutions Consultant | Ex Machina

2018 – 2019 | Amsterdam, NL

- Pre-sales support and implementation for ultra-low latency ultra high scale interactive video platform for top tier media clients globally (mainly US, some EU and Asia)
- Managed 100% uptime and scaling (1m+ concurrent users) stress tests and carried out pen testing (managed vendor selection and end-to-end process)

AI Product Manager | Bicycle AI (Y Combinator W17)

2017 – 2018 | San Francisco, CA / Bangalore, IN

- Leveraged deep AI technical expertise to fine-tune conversational ML models, operationalize data refinement pipelines, and achieve a 65% useful response rate.
- Conducted on-site technical discovery and workflow deployment at Customer Service departments of major enterprise client organizations in the US and India.

Early career

2013 – 2017 | Budapest, HU / Warwick, UK / Bangalore, IN

- Interned at pharmaceutical market research and market access companies in Hungary, UK and India
- Member of Nestlé’s leadership development program for ~3 years in Hungary, worked in the Budapest office and did Field Sales, Controlling and Trade Marketing
